Professional Summary

Full Stack Software Engineer with 2+ years of experience building scalable backend systems and web applications using Java, Spring Boot, Node.js, Python, React, TypeScript, and AWS. Experienced in cloud-native APIs, event-driven services, and AI-powered applications with a focus on performance, reliability, production-ready delivery, and scalable system design across high-impact engineering projects.

Technical Skills

Programming Languages:	Java, Python, TypeScript, JavaScript, SQL
Backend Development:	Spring Boot, Spring MVC, Node.js, FastAPI, GraphQL
Frontend & Frameworks:	React.js, Redux, Zustand, HTML5, CSS3, Tailwind CSS, Vite, Streamlit
Databases & ORM:	PostgreSQL, MySQL, Redis, MongoDB, Hibernate, Sequelize
Cloud & DevOps:	AWS, Docker, Kafka, Jenkins, GitHub Actions, Terraform, Control-M
Testing & Observability:	JUnit, Mockito, Jest, Unittest2, Selenium, Cypress, Postman, Datadog
Developer Tools:	Git, GitHub, VS Code, IntelliJ, GitHub Copilot, OpenAI APIs

Professional Experience

Bear Brown & Co	October 2024 – December 2024
Software Engineer Intern	
• Architected AI-powered chatbot web applications using Python and Streamlit to support university portals and CRM workflows, enabling real-time conversational assistance and improving response performance by 50% .	
Formless Inc	June 2024 – October 2024
Software Engineering Intern	
• Developed APIs in Spring Boot and Node.js and deployed via Jenkins-based CI/CD pipelines (integrated with GitHub Actions) to AWS ECS and Lambda, resolving production incidents and response latency by 30% .	
• Designed GraphQL APIs consumed by React applications, improving feature reliability by 18% and enhancing CloudWatch monitoring.	
• Implemented React-based frontend features integrating REST APIs with validation logic, state management, and consistent UI patterns, improving workflow reliability and operational task completion rates.	
Atos	March 2023 – June 2023
Associate Consultant - GCM 2	
• Led the migration of backend services into modular Java components, supporting over 500,000 daily ledger events using Kafka-based messaging with PostgreSQL-backed persistence.	
• Collaborated with Agile teams using Jira for sprint planning and backlog refinement, to deliver scalable platform features.	
• Enhanced React.js customer dashboards by optimizing API data fetching, state management, and component rendering, reducing load times and increasing user task completion rates by 25% .	
Atos	March 2021 – February 2023
Associate Consultant - GCM 1	
• Created Java services on AWS EC2 exposing payment-processing APIs, including request validation, secure persistence in RDS (MySQL), status tracking, and managed API exposure via API Gateway, maintaining 99.9% uptime.	
• Optimized backend performance using query tuning, schema design, and caching strategies, improving response times by 21% while maintaining reliability for high-frequency data pipelines.	
• Improved service quality via automated testing using JUnit, Selenium, REST-assured, and Jest, reducing regressions and improving reliability.	

Projects

InsightIQ – AI Analytics Dashboard <i>React.js, TypeScript, FastAPI, Docker, PostgreSQL, Redis, LLMs</i>	
• Programmed InsightIQ, a data ingestion and analytics platform using FastAPI and React, leveraging Claude for AI-assisted backend development, test generation, and API validation across asynchronous workflows with PostgreSQL and Redis.	
Personal Data Vault <i>Java, Spring, React.js, MySQL, JWT, Web3j, Docker, WebSocket, Swagger</i>	
• Worked on building Spring Boot backend services with JWT authentication, OpenAPI documentation, and transactional workflows, ensuring secure state management and stable performance under concurrent, high-throughput request loads.	

Education

Northeastern University	Boston, MA, USA
<i>Master of Science in Computer Software Engineering (GPA: 3.83)</i>	2025
<i>Teaching Assistant – CSYE7374 Design Patterns</i>	
<i>Relevant Courses: Object-Oriented Design, Web Development, Cloud Computing, Data Structures & Algorithms, Design Patterns</i>	
Savitribai Phule Pune University	
<i>Bachelor of Engineering in Computer Engineering (GPA: 3.70)</i>	
<i>Relevant Courses: Machine Learning, System Design, Database Management, Computer Science, Information Systems, Distributed Systems</i>
